

November 24, 2004 - San Francisco, California and Karachi, Pakistan. AEI Press Release 2004/01.

AMROHA Engineering Inc. & EXIPROMO International Announce signing of an Agreement for the Sale of X-ray Baggage Scanner Equipment and Explosive Vapor & Trace Detectors to Pakistan Airport Security Force. ("ASF").

Amroha Engineering Inc., an original equipment manufacturer (OEM) and a distributor of security products, today announced the signing of an agreement between Amroha Engineering Inc. ("AEI"), and Pakistan Airports Security Force ("AEI") for the sale of Hold- and Cabin-baggage X-ray scanners, and Explosive Trace Detectors. These units will be deployed at three largest international airport in Pakistan. On AEI's side, the agreement was signed by its Pakistan arm, Exipromo International (Pakistan) Limited.

AEI, a system engineering and integration firm based in Richmond, California, is a distributor for security equipment in the US, Pakistan and Nigeria. Under this agreement with ASF, AEI will provide installation, training, and on-going maintenance services for the equipment. AEI was able to conclude this sale amidst a fierce competition from all major names in the industry. The winning points were AEI's strong knowledge of local tendering procedures, its demonstration of equipment's cost-effectiveness over a 3-year period, and the advanced technology used in the equipment it is supplying. AEI further offered a strong presence in the local market through Exipromo International (Pakistan) Ltd., AEI's local marketing arm.

Shams Naqvi, President of Amroha Engineering, stated, " For this sale, AEI has selected X-ray equipment on the basis of its use of open technologies, which when compared with the proprietary industrial Single Board Computers used by major name brands, is a significant cost reduction over the long term. Additionally, AEI has ensured that the equipment being supplied will follow a uniform manufacturing standard across all machines sold, whether in the US or in Pakistan. Pakistan and other lower-volume markets are exposed to significant disadvantage by some manufacturers of security equipment. These other companies use better quality components in the equipment that they sell in North America and Europe, while same models when sold to Pakistan at a higher price on a 3-year cost basis, are supplied with lower grade components."

About Amroha Engineering Inc.

AEI, incorporated in 1993, is a systems engineering and integration firm, engaged as an ODM/OEM manufacturer of industrial computers and servers, and as a system integrator providing enterprise-level solutions and products for the entertainment, financial, medical, and security verticals.
