

March 28, 2008 - San Francisco, California and Karachi, Pakistan. AEI Press Release 2008/01.

Equipment supplied by AMROHA Engineering Inc. is key to Security Clearance and Certification of Lahore International Airport by United States Transportation Security Administration ("TSA").

Lahore, Pakistan - Pakistan Civil Aviation Authority ("CAA") and Pakistan Airports Security Force ("ASF") announced here that the US-TSA has completed its review of the security equipment and procedures at Lahore International Airport in order to verify if they meet ICAO and US standards, with a goal to determine if direct non-stop flights between Pakistani and US airports would be feasible. The announcement added that the TSA officials found the airport meeting these security standards, and therefore, Lahore International Airport has been cleared for non-stop flights between the two countries.

Amroha Engineering Inc. is proud that the three key security equipment and systems that the TSA officials reviewed were the advanced technology products and systems provided and/or integrated by AEI. These items included Implant Sciences Corporation's Quantum Sniffer ("QS") explosive detectors, Under-Vehicle Imaging System at airport entry, and AEI's Intelligent Perimeter Security System which secures the 11-km long airport perimeter. ASF demonstrated QS for detection of several explosives.

Mr. Shams Naqvi, CEO of AEI, stated, "We are pleased that we are the company that provided security equipment and consulting to ASF and CAA that helped our customers in meeting the strict standards that the TSA applies specifically to Pakistan. It is good to know that we helped our customers also in the design of their electrical power systems around airport perimeter, which helped Lahore Airport meet Pakistani, ICAO and US requirements for airport security."

About Amroha Engineering Inc.

AEI, incorporated in 1993, is a systems engineering and integration firm, engaged as an ODM/OEM manufacturer of industrial computers and servers, and as a system integrator providing enterprise-level solutions and products for the entertainment, financial, medical, and security verticals.
