

June 18, 2010 - San Francisco, California. AEI Press Release 2010/01.

AMROHA Engineering Inc. offers its expert services for the design and integration of WARRANCHIP™ for warranty assessment.

San Francisco, California – Amroha Engineering, Inc. announced here today its offering for design and integration services surrounding WARRANCHIP™, an innovative integrated system methodology designed to provide real time records of a product’s operational data usable for warranty assessment of manufactured goods. WARRANCHIP™ is a patent-pending proprietary design currently owned by AEI’s president Mr. Shams Naqvi. Once integrated, the offered system becomes part of the host product and during product’s life cycle, provides useful data to establish veracity and validity of warranty claims.

In 2008, the worldwide warranty claims of U.S.-based companies stood at \$29 billion (*source*: Warranty Week, May 07, 2009. <http://www.warrantyweek.com/archive/ww20090507.html>). WARRANCHIP™ is designed around the understanding that not all of these claims are necessarily fully valid. AEI is convinced that by using WARRANCHIP™, manufacturers could reduce their cost of warranty claims.

Mr. Shams Naqvi, CEO of AEI, stated, "We are pleased that our offering is set to potentially reduce the cost of US products by cutting down warranty claims costs that today add nearly 2.0 – 2.8 % to a manufactured product’s top line. We would like to see WARRANCHIP™ move some of those numbers to the product’s bottom line."

Application-specific pricing for design and integration services are available upon request.
